EUR 2,100 (no VAT)

Comprehensive Online Preparation for the ACI Diploma

The very efficient method of preparing for the ACI Diploma. Continuously updated to cover the latest developments in the syllabus and in the ACI examination mode. Tried and tested in practice by implementing our long-standing experience from numerous ACI Diploma Colleges with the best pass rates worldwide. The actual test situation is simulated by means of mock tests which model the scope, content, question technique and assessment mode of the actual exam. With more than 2.500 questions participants can make an effective training and a reliable assessment of whether they are „ready“ to take the exam.

Target group

Experienced traders seeking comprehensive and internationally recognised certification of their skills and performance. In order to be eligible to take the ACI Diploma exam, the candidates must have prequalified by having passed the Dealing Certificate examination.

Prerequisite

ACI Dealing Certificate

Training Method

- E-learning online with personal coaching: online support from experienced Cyber*Trainers, regular feedback
- Individual design of the learning process to reflect prior knowledge and learning style: comprehensive course handbook covering individual subject areas, questions structured into 3 learning levels, tests on various levels
- Learning in a virtual group thanks to our benchmarking system

Course Content

The contents and the structure of the Cyber*School preparation are 100% in line with the actual ACI syllabus.
